

FACT SHEET

NOSCAR™ NIOSOMAL HEALING SYSTEM

PRODUCT OVERVIEW

It is a targeted transdermal delivery platform engineered with advanced niosomal encapsulation and sustained-release (SR) technology. Designed specifically for scar treatment, it ensures high stability and retention of active ingredients within the skin, promoting effective tissue repair and long-lasting results.

FEATURES AND KINETICS

- 3× higher retention
- 5× efficacy boost
- Sustained release
- Stable & protected actives
- Gentle on skin

MECHANISM OF ACTION

1. **Enhanced delivery:** Niosomes drive actives deep into scar tissue with improved stability.
2. **Prolonged action:** Sustained release supports continuous regeneration and healing.
3. **Support scare repair:** Anti-inflammatory & antioxidant effect.

KEY INGREDIENTS

- NioKap® Technology
- SRKAP® Technology
- Niosomal encapsulation of bioactives (Onion Extract, Green Tea, Vitamin E, Aloe Vera, Silicon)

STORAGE CONDITIONS

- Store at room temperature, protected from light and heat.
- Do not freeze, as freezing may disrupt liposome integrity.
- Keep in tightly sealed containers to avoid water loss.

APPLICATIONS

- Whitening & brightening creams, serums, lotions.
- Anti-pigmentation care for dark spots and uneven tone.
- Radiance boosters for luminosity and even complexion
- Anti-aging skincare with whitening and rejuvenating effects.
